CAREER OBJECTIVE

Motivated engineering graduate seeking an entry-level role to apply programming and problem-solving skills in software development and AI-based projects. Passionate about building scalable applications, learning new technologies, and contributing to innovative, user-centric solutions.

EDUCATION

Bachelor of Technology (Computer Science and Engineering) **2022 - 2026**
NBKR Institute of Science and Technology CGPA: 8.17/10

Board of Intermediate (MPC) **2020 - 2022**
CVSR Junior College Marks: 723/1000

Board of Secondary Education **2019 - 2020**
Alpha EM High School Marks: 555/600

INTERNSHIP

Rejoice June 2025 - August 2025

- Developed and maintained responsive web interfaces using HTML, CSS and JavaScript improving website usability and user experience.
- Optimized page performance and code structure, reducing page load time by around 30%.
- Collaborated with designers and backend teams to implement UI components and features, ensuring consistent design and smooth functionality across devices.

TECHNICAL SKILLS

- **Programming Language** Python
- **Database** MySQL
- **Web Technologies** HTML, CSS, JavaScript
- **Web Tools** Git, GitHub, VS code

SOFT SKILLS

Communication | Time management | Problem-solving | Leadership

PROJECTS

Intelligent Threat Detection and Tracking System

- Designed and implemented an autonomous surveillance system using YOLOv8 for real-time person and weapon detection with AI-powered threat analysis.
- Developed a pan-tilt camera tracking mechanism using ESP32 and servo motors to continuously follow identified threats with smooth subject tracking.
- Integrated Flask, Cloudinary, and Twilio APIs to send instant WhatsApp alerts with suspect images and Google Maps location to security personnel.
- Improved surveillance reliability using skeleton pose estimation, multithreading, and a 2-second verification rule to reduce false threat detection and ensure stable monitoring.

KUSHI

- Developed an AI-powered chatbot system to handle user queries and deliver automated responses, improving responses time by around 40%.
- Designed a responsive and user-friendly interface using flutter and Dart, ensuring smooth cross-platform performance across multiple devices.
- Implemented efficient backend processing and concurrent query handling, allowing the chatbot to manage multiple user requests simultaneously with improved system performance

CERTIFICATIONS

Artificial Intelligence Fundamentals – IBM SkillsBuild August 2025

- Earned certification in Artificial Intelligence Fundamentals covering Machine Learning, Natural Language processing (NLP) and Computer Vision. Awarded a verified digital badge via Credly.
